

scientific communication

SCOPE

The Scientific Communication department is available for:

- > Bibliographic research and scientific summaries on themes of your choice.
- > Article preparation for international distribution of your results , offering recognition in the scientific and medical fields.
- > Creation of scientific posters.
- > Preparation and/or performance training.

Article preparation

Creation of posters

resources

- > **Qualified team**
Our department Manager, with a PhD in Sciences, works in collaboration with doctors, pharmacists, trial managers, a translator and our Marketing communication department.
- > **Current technology surveillance**
A full documentary library made up of numerous scientific and technical publications.
An internal document base and access to more than eighty databanks on line.
- > **Personalized communications**
Laboratoire DERMSCAN has prepared more than one hundred communications (articles, conferences, posters)*
 - Price of the best article (I.J.C.S. - 1994)
 - Price of the best poster (4th SPTC Congress - 1994 / Stratum Corneum III - 2001)

** Upon request, a complete list of publications and/or re-prints will be sent.*
